THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE  
OF THE UNITED STATES WITHIN THE MEANING OF THE ESPIONAGE ACT 50  
U.S.C. 31 AND 32 AS AMENDED. ITS TRANSMISSION OR THE REVELATION  
OF ITS CONTENTS IN ANY MANNER TO AN UNAUTHORIZED PERSON IS PRO-  
HIBITED BY LAW. REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

25X1

### 1. Location :

At the northwestern town border of Baranovichi (26°02'E/  
53°08'N), White Russian SSR, opposite a locomotive re-  
pair plant, in an angle formed by the railroad lines to  
Brest and Vilnius on the road to Kolpenitskiye\*. For location  
see Annex 1.

### 2. Plant installations :

The plant area, approximately 400 x 300 meters, is sur-  
rounded by a wooden fence. The plant construction, part  
of the 5-Year Plan, started in the Spring of 1948, and  
was scheduled to be completed in 1950. One source stated  
that, presumably for the lack of labor force, this work  
was discontinued in April 1949. Three turbines were  
planned. Two turbines, allegedly from a dismantled power  
plant in Rostock, arrived before November 1948 and were  
stored in the plant area. The approximate dimensions of  
the turbine house were 40 x 40 x 16 meters. The attached  
administration section was 18 meters high. Next to the  
turbine house was a building, 15 x 15 meters, supported  
by concrete pillars. All buildings were brick structures.  
(For side view see Annex 2. For plant layout see Annex 3).

Annex 3/1

Legend to Annex 3

- 1 Entrance and guard house
- 2 Storage of construction materials
- 3 Construction office, wooden building
- 4 Water tower under construction, excavations 4 meters deep, 20 meters in diameter; concreting did not start.
- 5 Coal bunker under construction, concrete structure, 50 x 12 x 3 meters
- 6 Conveyor belt to conveying tower under construction
- 7 Conveying tower, 10 x 10 x 12 meters, ferro-concrete bare structure completed
- 8 Projected conveyor belt between conveying tower and main plant building.
- 9 Fitting shop, brick building, 25 x 8 x 4 meters, constructed in 1947/48, working for plant requirements
- 10 Machine shop, brick building, 60 x 10 x 8 meters, bare structure completed, since December 1943 storage of valuable machines from Rostock
- 11 Power plant building, total dimensions will be 40 x 40 meters
  - a Turbine foundation
  - b Four-story section, 12 meters high, bare structure completed
  - c Four-story section, fourth floor alone 20 meters high, with narrow gauge railroad tracks on top for coal shipments. The third floor houses four ferro-concrete funnels, 8 meters high, intake opening 4 x 4 meters and outlet opening 2 x 2 meters.
  - d Section, 4 meters high, bare structure completed one additional story to be constructed.
  - e Basic walls, 8 meters high, with consoles for the installation of a traveling crane
